The restriction, applied to claims 1-103, mailed on September 08, 2005 is now withdrawn because it is not clear.

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-101, drawn to a detector used in a mass spectrometer, classified in class 250, subclass 397.
- II. Claims 102-103, drawn to a method for detecting particles, classified in class 315, subclass 103CM.

The inventions are distinct, each from the other because:

Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case, claims 1-101 recite the detector in a mass spectrometer, which is used to detect ions while claims 102-103 recite the method for detecting particles not ions.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

A telephone call was made to Jamie H. Rose on 12-23-2005 to request an oral election to the above restriction requirement, but did not result in an election being made.

Art Unit: 2881

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kiet T. Nguyen whose telephone number is 571-272-2479. The examiner can normally be reached on Monday-Friday from 8.00 AM to 6.00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, John R Lee, can be reached on Monday-Friday. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
